### DETAILED ACTION

This Office action is in response to the application filed September 28, 2001.

1. Claims 2 and 4 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Election was made **without** traverse in Paper No. 5.

#### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by PAPPAS et al.

The claimed invention is drawn to a lithographic printing plate precursor comprising a support having a hydrophilic surface having provided thereon an image-forming layer containing a hydrophobic high molecular compound having at least either a functional group represented by formula (1) or a functional group represented by formula (2):

PAPPAS et al anticipates the claimed invention at Examples 1-5 wherein the recited hydrophobic high molecular compound is met by the diazo adduct which is a reaction product of a sulfonated polymer and a diazo resin. The diazo resin having cationic side groups of diazonium meet the claimed ion as recited in claim 1.

Further the methoxyethanol as seen in the Examples meet the claimed compound having a functional group defined by formula (3) or (4).

Art Unit: 1752

No claim is allowed.
